PRINTING

choose from a variety of printing method

SILKSCREEN

A printing technique that used a woven mesh to support an ink-blocking stencil to receive a desired image.

PAD/ROLL PRINTING

The most versatile of all printing processes with its unique ability to print on three-dimensional objects and compound angles.

UV PRINTING

Suitable for imprinting photo with fine detail. Can be used to print full colour picture.

HEAT TRANSFER

Heat transfer printed images are durable, heat resistant, adhesive and water resistant. Can be used to print on fabrics, mugs and other products.

LASER ENGRAVING

Precise positioning and elegant looking, suitable to used on wooden, metal & glass.

EMBROIDERY

embroidery is most often used on bags, caps, T-shirt, towels. It is available with a wide variety of thread or yarn color.

METAL PLATE

Personalized your logo on a metal plate.

EPOXY STICKER

Full colour printing can be done with doming resin.

DEBOSS

For promotional gifts on the executive level, debossed leather or vinyl make elegant reproductions of a company logo or name.

HOT STAMPING

In the hot stamping process the foil is applied to product with a heated die, typically in gold or silver colour, with a shiny & slight deboss effect.
